NARRATIVE DESCRIPTION OF PROJECT:

This temporary transfer of water involves instream conveyance of 1.19 cfs from POD (near Cle Elum) to Chandler Canal at Prosser Dam. Approximately 4/9 (160 ac-ft) of total quantity (360 ac-ft) will enter the KID Main Canal. The remaining 5/9 (200 ac-ft) will re-enter the Yakima River below the Chandler Pumping Station (due to operational requirements of hydraulic pump at Chandler).

60 of the 75 irrigated acres will be fallowed this year to allow for this transfer. The remaining 15 acres will be irrigated with approximately 93 ac-ft.

WTWG Project form

The 2005 Drought Water Transfer Working Group hereby notes that all parties retain their right to petition the court for appropriate relief if this transfer causes harm to their, or any other party's, valid water rights or interests. This transfer applies only to 2005 drought year and does not set a precedent for water transfers in future years on any issue including, but not limited to, the validity and extent of the water right at issue. Consideration by, or any determination by, the Water Transfer Working Group shall not be used as evidence of, nor waive any argument concerning, future proposed permanent or temporary transfers under either applicable federal law or contract or state law including RCW 90.03.380. Any determination here is also not intended by any party to be a concession as to the appropriate procedures for transfers in the future.
